

PENNINGTON RESIDENCE

PENNINGTON, NJ

CASE STUDY

The homeowners wanted to add to the rear of the home in a way that highlighted the lush beauty of the backyard but also permitted natural light to penetrate the central hall on both floors. An additional goal was to give those entering the front hall a glimpse of the backyard. To achieve those goals, the south-facing rear facade, as well as the east and west-facing walls, were heavily fenestrated. The addition of three Marvin Clad French Doors and several large windows allowed the entirety of the house to be filled with ample amounts of light.

**PROJECT HIGHLIGHTS****Architect:**

Douglas R. Schotland

Builder:

Doyle Builders

Product Types:

Marvin Clad Ultimate French Doors

Marvin Next Generation Clad Ultimate

Double Hung Windows

Marvin Clad Ultimate Casement Windows

Marvin Clad Ultimate Awning Windows

WINDOW AND DOOR SOLUTIONS

Marvin Clad Ultimate French Doors, Next Generation Clad Ultimate Double Hung Windows, Clad Ultimate Casement and Awning Windows were selected for the renovation. Marvin windows and doors were chosen for their durability, thermal performance, and particularly for their exacting detailing. The homes existing double hung windows had to be replicated, down to the muntin profiles. Based on the architect's previous experiences with Marvin products, he knew Marvin would execute the details flawlessly. Being that the windows were one of the projects most salient details, the execution had to be perfect.
